

Title: Security and Confidentiality for the BCBA

Credits: 1.0 Type-2 Credits

CE Instructor: Kimberly Shamoun

Co-Instructor: Alan Shamoun

This workshop provides a review of the BACB's "*Guidelines for Responsible Conduct for Behavior Analysts and Professional Disciplinary and Ethical Standards*", specifically on how it relates to securing and protecting confidential client information. Analog and digital documents (paper versus computer files) will be discussed, as well as the systems we use in our day to day work.

Learning objectives: Participants will...

- Be able to analyze and assess if they are utilizing best practice procedures for securing and protecting confidential information.
- Learn about methods and technologies that can be used to be in compliance with the intent of the BACB Guidelines regarding the potential for breaches.
- Be able to identify potential changes that may need to be made to be in compliance with BACB requirements on protecting client's confidentiality.
