

**Title: Video Modeling: Preparation and Application of Videos**

**Credits: 1.0 Type-2 Credits**

**Presenter: Sharlene Corrigan, MA, BCBA**

This workshop covers the history of modeling, including Bandura's Social Learning Theory and a description of video modeling. Sharlene describes some of the research on video modeling and its application to teaching individuals with ASD. This presentation also covers the steps in preparing videos, including the different methods used to create videos and data recording procedures.

Learning objectives: Participants will...

- Identify the origin of observational learning
- Be able to describe the application of video modeling research in the treatment of individuals with ASD
- Be able to identify the steps used in creating a video model
- Be able to describe the steps used in teaching via video modeling: including error correction and prompting procedures that may be needed when using video modeling
